

Algon 4H Capillary Matting

GROWFELT

product information

Based on our popular Lantor capillary matting range, Algon is an innovative reservoir and distribution system designed specifically for use in garden centres and retail display units, where both performance and appearance are vital.

Applications:	Outdoor easy-clean capillary matting
Fibre composition:	Wool/Mixed Fibres/Synthetic Binder Easy clean, spunbond polypropylene layer
Nominal weight:	529g/m² (+/- 5%),
Nominal thickness:	8mm
Roll width:	1m, 1.22m
Roll length:	25m
Water Holding:	5 Litres/m² (Approximately) (DIN 53923)
Irrigation:	We recommend trickle hose or seep hose system - lines a maximum of 60cm apart. Also suitable for overhead water holding systems and hand watering.
Additional Information:	Lasts 2-3 seasons, approximately; due to varying site conditions. Available also in cut pads to customer requirements for use in trays and benches.
Cleaning:	Algon can be cleaned easily by light brushing or wiping with a cloth - this is best done by removing the matting pad from its tray and holding it vertically against the body. To retain performance and appearance, matting should be cleaned on a regular basis. To minimise growth of algae, matting can easily be cleaned by brushing lightly with a dilute solution of commercial cleaning products such as Citrox (dilute citric acid) or Jeyes Fluid (follow manufacturer instructions).
